

Anti-Icing Agent

Trac Free is an environmentally responsible solution to help fight a winter storm before it arrives. When applied to sidewalks, steps, ramps and traffic areas before a storm, it will prevent the bonding of snow and ice to the surface. This means a fast and effective clean-up after the storm. It can also be used on metals such as fire walks, fire escapes and ladders used to access electrical, communication, and other similar equipment that need to be maintained during the winter. It reduces the overall cleaning costs due to the use of granular ice melt. It is tested and proven to be effective to -25°F. This formula is ready to use.

BENEFITS

- * Eliminates tracked-in ice melt granules
- * Prevents white residue on floor surfaces
- * Helps prevent slips & falls
- * Reduces ice melt usage
- * 48 hour residual activity
- * Stays where applied - Does not track indoors

SUGGESTED AREAS OF USE:

- | | |
|----------------------|-----------------------|
| * Building Entryways | * Parking Lots |
| * Concrete Sidewalks | * Walk Ways |
| * Staircases | * Hard To Reach Areas |
| * Steps | * Fire Walks |
| * Handicap Ramps | * Fire Escapes |
| * Decks | * Ladders |
| * Driveways | * Utility Poles |
