

MEGA SORB

Next Generation
Hydrophobic Absorbent

B4052-30

G3063

Health	0
Flammability	0
Physical Hazard	0
Protection	

Appearance & Odor.....	Brown fibrous powder with no odor
Specific Gravity (H2O=1).....	1.15
Net Contents.....	1 US GAL, 30 LB

Absorbs on Contact!

Natural System to Absorb Spills and Bio-remediate Hydrocarbon Waste

MEGA SORB is an "ALL NATURAL" biocatalyst. **MEGA SORB** does NOT contain any manmade, cultured or genetically altered micro-organisms. **MEGA SORB** contains all the natural ingredients necessary to accelerate the indigenous microbes to a point where they will rapidly digest unwanted hydrocarbons while encapsulated in the absorbent material. **MEGA SORB** uses biological action to digest and encapsulate oil and hydrocarbons. No harm will ever be done to the environment by the use of **MEGA SORB**.

- Absorbs up to six times its weight in oil or oil-based products.
- Lightweight material which will lower the cost of disposal.
- Ground cleaning by accelerating bio-remediation.
- Encapsulation prevents leaching of oil into the soil or groundwater.
- Safe around plants and livestock

DIRECTIONS

1. **Spills in Soil:** Till or rake **MEGA SORB** directly into the spill until area is light colored. Let sit 12 hours then thoroughly wet down with water. Keep area moist for 120 days. **Not for use on acids.**
2. **Surface Spills:** Completely cover liquid spilled to suppress vapors. Do not sweep until **MEGA SORB** has absorbed liquid.
3. **Bio-remediation:** Normally one box per cubic yard/meter. Please contact your sales representative for application protocol based upon the contaminant.

Areas of Use:

- *Hotels
- *Cities & Counties
- *Refineries
- *Oil Fields
- *Plumbing Shops
- *Vehicle Maintenance
- *Apartments
- *Warehouses
- *Amusement Parks
- *Parking Lot Clean Up
- *Manufacturing Facilities
- *Equipment Maintenance
