

K159 ULTRA SEAL

100% Solid Epoxy Seal

Flooring

Ultra Seal is an epoxy plastic of 100% solids contents, that forms a seamless protective coating for concrete, steel, brick, or wooden floors. **Ultra Seal** is resistant to acid, caustic, gasoline, solvent, urine, and oil. The average mill thickness of **Ultra Seal** is 14 mills, and will cure tack-free in 1 hour. Ready for heavy traffic in 24 hours at 70°F. **Ultra Seal** creates an excellent anti-slip surface where accidental slipping may cause personal injury. Colors: light gray.
