

INSTANT HAND SANITIZER

SANI FOAM is a non-alcohol, foaming instant hand sanitizer.
SANI FOAM kills 99.9% of common germs in just 15 seconds.
 Benzethonium Chloride, a unique quaternary ammonium compound is used to provide an efficacious, non-flammable and economical alternative to alcohol based sanitizers.
SANI FOAM'S unique foam provides twice as many applications per ounce as gel or liquid sanitizers.
SANI FOAM is available in an attractive portable table top bottle. For added security and functionality, an economical wall bracket is available.
