

KA502 DIGESTASE ALL PURPOSE POWDER *Bacterial / Enzyme Digestant*

Sewer & Drain Maintenance - Powder

Digestase All Purpose Powder is a product that utilizes the powerful waste digesting abilities of special bacteria and natural enzymes. It is a blend of bacillus bacteria strains (both anaerobic and aerobic types) cultured for their ability to digest organic waste - quickly, efficiently and without odors! The natural enzymes quickly break down proteins, starch, carbohydrates, animal and vegetable fats & oils, and paper for the most effective waste digestion. Regular use will establish thriving colonies of these waste-digesting bacteria to provide uninterrupted cleaning action in all drains, plumbing and septic systems. This continuous digestion prevents accumulation of sludge, scum, grease and all other organic solids. It unclogs drains for full flow and reduced odors. In septic systems, it will eliminate solid carry-over, odors, and reduce the frequency of pump-outs. It introduces micro-organisms into the soil for improved drainage and smooth operations of drain fields or leach beds.

FEATURES:

- * Attack, Liquefy & Remove Grease, Fat & Oil Faster
- * Contains Both Anaerobic (can live in airless environments) & Facultative (can live with or without oxygen) Bacteria
- * Contains Vitamins & Enzymes To Enhance Bacterial Growth

USES:

Municipalities, Institutions, Industries, Sewage Systems, Drains, Grease Traps, Septic Systems, Toilets

EFFECTIVE AGAINST:

Odor, Grease, Digests Waste, Reduces Sludge

SPECIFICATIONS:

Appearance: Powder
Fragrance: Yeast-like
Colony Count: 3 Billion / Gram
Breaks Down Fats & Grease: Lipase
Breaks Down Proteins: Protease
Breaks Down Cellulose: Cellulase
Breaks Down Carbohydrates & Starches: Amylase
